HOT TUBS

The Celtic Journey

The ancient Celt's journey in Europe dates back to 800 BC and over the years, setup shop everywhere from Turkey and Ireland to Britain and Spain.

The Celt's were a people described as whimsical, romantic, emotional and with great powers of imagination. They were also a spiritual people and many of their ancient symbols, the Triskelion, Shamrock, Tree of Life are still seen in our day to day lives and perceived to be positive symbols that have been revered for millennia. In fact, one of the Triskelion symbols that depicts the "motion of action" we have chosen as the symbol of our exclusive Turbo Boost Whirlpool system.

Another connotation, and the one that has inspired us the most is the three sided Triskelion, as a symbol of "spirit, mind, and body", all things we believe can be enhanced while relaxing in your Celtic Hot Tub!

From all us "would be Celt's, we hope you'll choose a Celtic Hot Tub and begin your Journey today!

USA Made. Celtic Inspired.

With over 10 decades of industry expertise, Celtic Hot Tubs is dedicated to providing the highest quality product with long-lasting performance and dependability; a durable product engineered with customer satisfaction in mind. Our spas come fully loaded with many of the same features you see in a high-end luxury hot tub, but at a more affordable price. Every member of our team is dedicated to meeting high standards of customer service.

ENERGY SHIELD INSULATION

As energy costs continue to rise, as does the awareness for our responsibility to conserve energy. We have spared no effort nor cost to build your Celtic Hot Tub to operate efficiently and at the lowest cost possible.

The backside and bottom of the tub's interior is covered with a thick layer of closed cell foam. Around the outside of the tubs frame, we install a double-sided reflective heat wrap.

In effect, we have developed the thermal pane window concept of a double-sided insulation concept with air in between. Effectively keeping the water warm, and the freezing weather out.

In order to keep the moisture out and the dry heat in, we cover the bottom of the tub and frame with a moisture proof sheet of high density polyethylene plastic.

As we all know, heat naturally rises, so we've capped the Celtic Hot Tub with the WeatherShield Hot Tub cover. This cover features a 4-inch to 3-inch tapered foam in order to allow the rain water to run off, and thick enough to stop any heat loss from the water. The WeatherShield cover is wrapped with a polyester fabric that is 70% lighter, 5 times stronger and will never "cold crack" as does marine grade vinyl as it ages.

CELTIC SHIELD™ INTERIOR

HDPE - High-density polyethylene plastic is known for its outstanding strength and has a high-impact resistance. It is extremely weatherable and will resist fading and discoloration. Unlike high gloss acrylic finishes, the Celtic Shield™ Shell has a soft touch slip resistant surface. This surface is an added safety feature and is the best way to prevent any slips or falls for both kids and adults. You'll also enjoy the way it hides fingerprints and water spots.

CELTIC SHIELD™ EXTERIOR

High-quality, beautifully textured cabinets made from weatherable material that is durable, UV resistant, and resembles the natural beauty of wood with an architectural grade cladding. Our Celtic Shield™ cabinets are built for strength and longevity.

TURBOBOOST WHIRLPOOL THERAPY SYSTEM

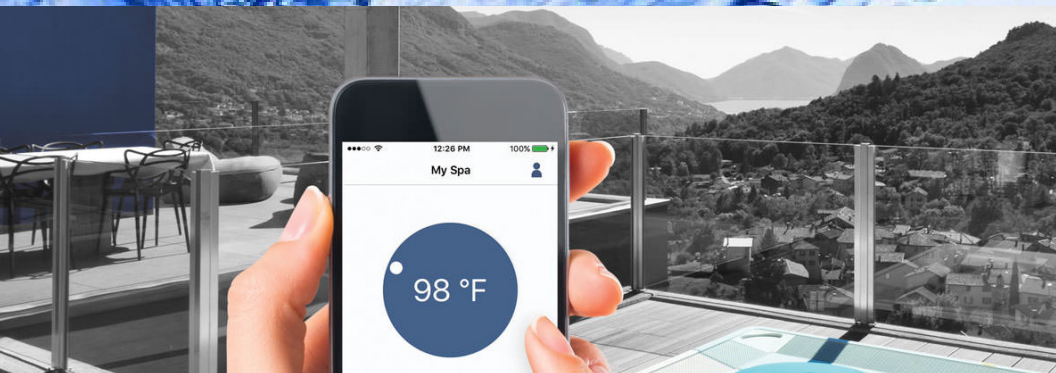

Hydrotherapy on a daily basis provides physical health benefits that go much deeper than just relaxation and pleasure. Our hydrotherapy system is really two systems in one.

First, is a collection of eight uniquely different size and styles of therapy jets positioned to work together and to reach all the critical areas in such a way as to deliver a heated massage to relax sore muscles. Secondly, with a simple turn of the jet sector located on top of the tub, you can activate the Turbo Boost Whirlpool jets that will create a true whirlpool of water rotating in the tub.

CELTIC CLEAN™ WATER MANAGEMENT

With one of the industry's state-of-the-art electronic control systems, the Celtic Hot Tub will start itself twice daily for a period of time you can easily select. During this filter cycle, as we refer to it, the pump will operate at a quiet and low-flow setting, where it will run cost efficiently while it skims water, both from the lower level of the tub and more importantly, directly from the water's surface as it skims off any floating particulates that would otherwise form a water line.

Next, all the water is sent through the exclusive Micro Skim filter and treated by the Celtic Clean Mineral cartridge (optional). Earth's natural minerals, like silver and zinc, for centuries, have been known for their natural qualities to kill bacteria and help the clean water. Perhaps best of all, every Celtic Clean system includes a built-in Ozone Generator, and a very special mixing chamber that allows the ozone to environmentally and safely breakdown to pure oxygen. Whenever the hot tub is running, Celtic Clean is working as it oxidizes finite sized particles, kills bacteria and significantly reduces the amount of chlorine or bromine required.

POWERED BY GECKO IN-TOUCH APP

Access your hot tub anywhere in the world using the in.touch application. Wherever you are, you're always in touch with your relaxation!

DURABLE FRAME

A frame like no other 15-ply cross-laminated, full circumference interlocking frame. It will support all of the hot tub's structural needs for decades. 2-inch dimensional lumber (as used to build your home) as well as high density foam are used to support and lock in all of the structural components.

CELTIC GLOW

The benefits of Celtic Glow, our LED-colored lighting system, range from practical to emotional. Much of your time in the hot tub will be in the evening when the lighting is necessary to provide a safe nighttime environment. Even the topside controls are backlit for good visibility.

For years, we've known about the emotional effects created from specific colors. How warm colors can spark emotions ranging from comfort and warmth or how cool colors can create a sense of calmness. Celtic Glow is included in all standard Celtic Hot Tubs.

Adjustable Waterfall w/ Color Lighting

RESORT SERIES

These hot tubs are often found in settings created for vacation and resort lifestyles.

Whether it's a lake side cottage or a top of the mountain cabin, these tubs are designed and built for heavy use.

Reliability is a must, and for those unfamiliar with operating a hot tub, the Resort Series tubs are designed with intuitive controls that make them easy to operate.

LUNA 114 RS

RESORT SERIES

Weight	360 lbs / 2,684 lbs filled
Measurement	34" Depth / 78" Diameter
Water Capacity	280 gal
Electrical Requirements	110 v / 15 amp Dedicated Circuit
Jet Pump	2 HP / 2 Speed / 110v
Convertible Voltage Heater	110v = 1KW Heat 220v =4KW On Demand
Jets	14
Topside Control	k300 Programmable Solid State System
Filtration	Micro Screen Disposable Cartridge
Lighting	9 LED Color Light
Interior Shell	High Density Polyethylene Weatherable & Strong
Exterior Cabinet	Celtic Shield Gray
In.Touch Remote	Optional
Celtic Clean	N/A Ozone Ready
Cover	Marine Grade Vinyl
Color	Titanium

Color: Titanium

MYSTIC 118 RS

RESORT SERIES

Weight	495 lbs / 3,317 lbs filled
Measurement	34" Depth / 78" Square
Water Capacity	340 gal
Electrical Requirements	110v / 15 amp Dedicated Circuit
Jet Pump	2 HP / 2 Speed / 110v
Convertible Voltage Heater	110v = 1KW Heat 220v =4KW On Demand
Jets	18
Topside Control	k300 Programmable LED Color System
Filtration	Micro Screen Disposable Cartridge
